

TWISTS IN GROMMETS

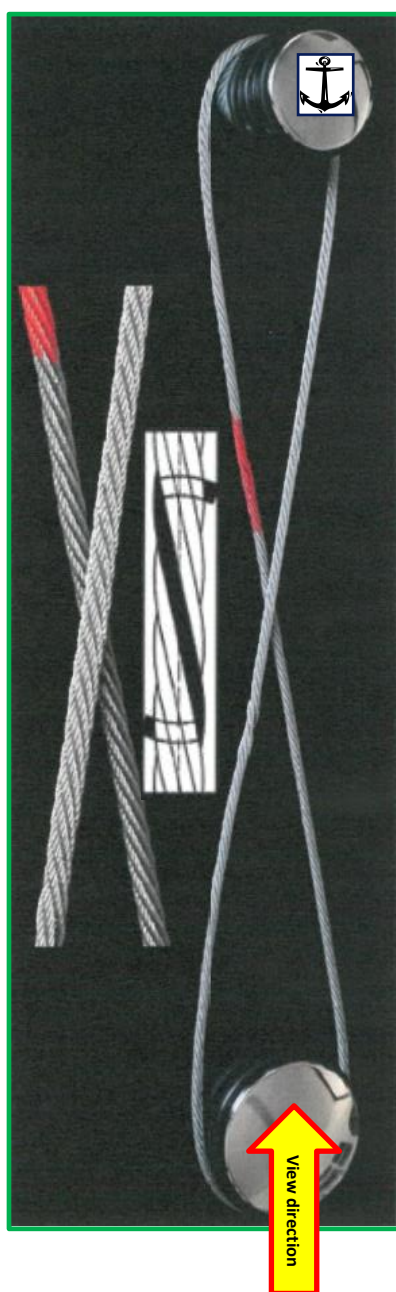

Example : GROMMET - Left hand lay

Twist $\frac{1}{2}$ turn left (Counter - Clockwise) seen from the bottom side

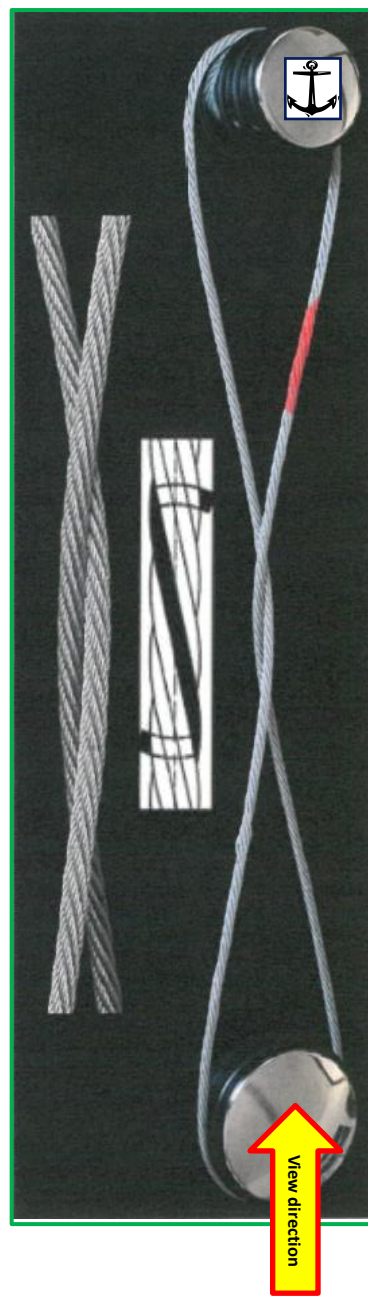

Cable lay turns open = length increases.

Note on inspection report: Left twist or CCW

This behaviour is known after production and common in due time after use

$\frac{1}{2}$ turn left or
CCW

1 turn left or
CCW

Example : GROMMET - Left hand lay

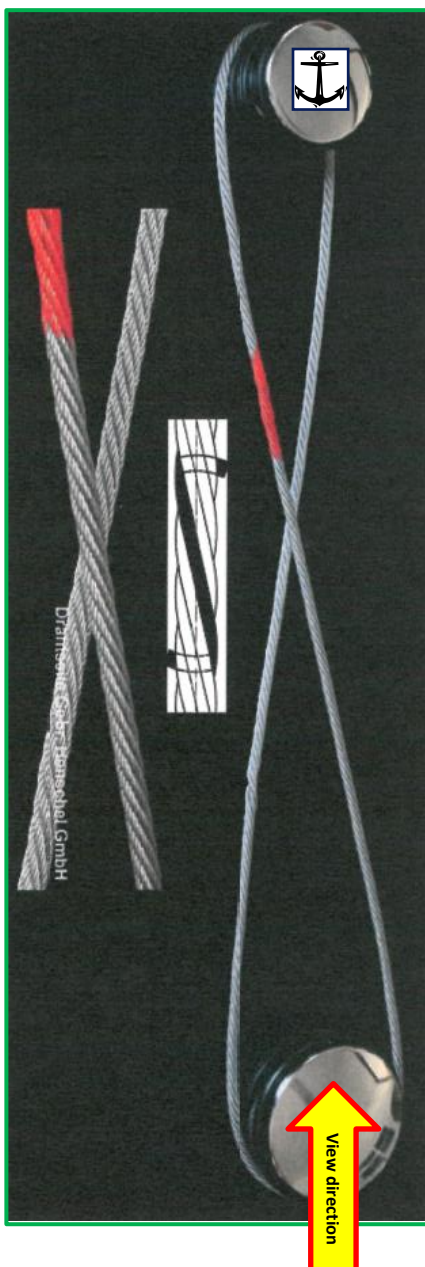

Twist ½ turn right (Clockwise) seen from the bottom side

Cable lay closes = length decreases.

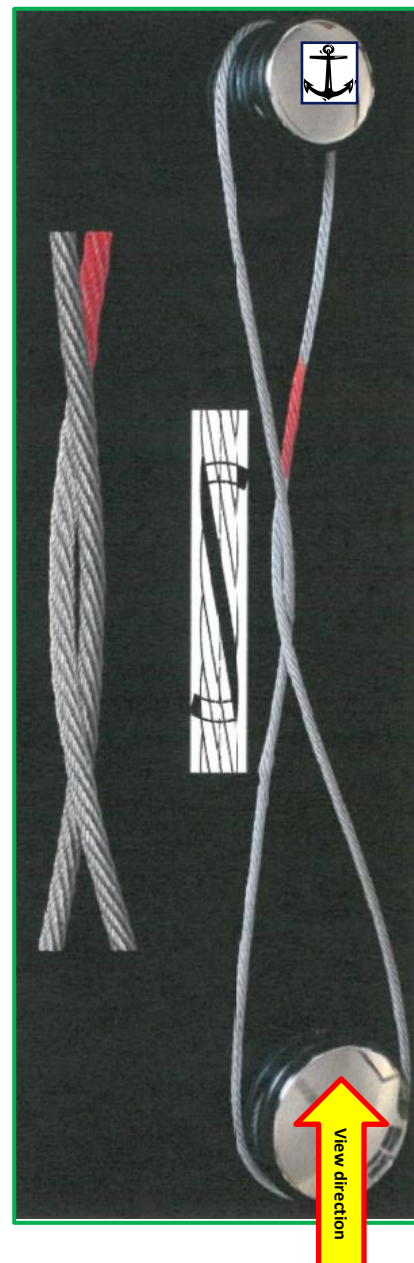

Note on inspection report: Right twist or CW

This behaviour is common after production and before first use

This behaviour appears often after improper handling (turned into it selves)

**½ turn right
or CW**

**1 turn right
or CW**
